## The Ultimate Wedding Day Timeline

Congratulations on purchasing the ultimate wedding day timelines! If you are a bride, this is a detailed timeline that can be used for knowing when your vendors should start their coverage for your wedding day and it can also be used to help build your wedding day timeline. If you are a photographer, you can also use this timeline as a template to build your own client's wedding day timeline.

If you are a photographer: Sending a detailed wedding day timeline to your clients helps educate and help them plan their day for a photography friendly wedding!

Copy and paste the explanations with each corresponding time frame when delivering to your client (see my example as a reference).

---

There are TWO versions!

A Wedding Day Timeline w/ a First Look and a Traditional Wedding Day Timeline
